What is a Drug List?

A Drug List, or Formulary, is a list of prescription drugs covered by your plan. Your plan and a team of health care providers work together in selecting drugs that are needed for well-rounded care and treatment.

Your plan will generally cover the drugs listed in our Drug List as long as:

- The drug is used for a medically accepted indication
- The prescription is filled at a network pharmacy, and
- Other plan rules are followed

For more information about your drug coverage, please review your Evidence of Coverage.

Note to existing members:

This **complete** list of prescription drugs covered by your plan is current as of August 1, 2025.

To get updated information about the covered drugs or if you have questions, please call UnitedHealthcare Customer Service. Our contact information is on the cover.

This Drug List has changed since last year. Please review this document to make sure your prescription drugs are still covered. In most cases, you must use network pharmacies to have your prescriptions covered by the plan.

When this Drug List refers to "we," "us," or "our," it means UnitedHealthcare. When it refers to "plan," "our plan," or "your plan," it means AARP Medicare Rx Saver from UHC (PDP).

Important message about what you pay for vaccines - Some vaccines are considered medical benefits. Other vaccines are considered Part D drugs. Our plan covers most adult Part D vaccines at no cost to you, even if you haven't paid your deductible. Call UnitedHealthcare Customer Service for more information.

Important message about what you pay for insulin - You will pay a maximum of \$35 for each 1-month supply of Part D covered insulin drugs through all drug payment stages, except the Catastrophic drug payment stage, where you pay \$0.

How can I find a drug on the Drug List?

There are 2 ways to find your prescription drugs in this Drug List:

- 1. **By name**. Turn to the section "Covered drugs by name (**Drug index**)" on pages 12-27 to see the list of drug names in alphabetical order. Find the name of your drug. The page number where you can find the drug will be next to it.
- 2. By medical condition. Turn to the section "Covered drugs by category" on pages 28-85. The drugs in this Drug List are grouped into categories depending on the type of medical condition they are used to treat. For example, if you have a heart condition, you should look in the category Cardiovascular Agents. This is where you will find drugs that treat heart conditions.

Can't find your drug?

Check the Drug List at **myAARPMedicare.com**. You can use online tools to look up your drugs. Updates to the Drug List are posted on our website monthly.

What are generic drugs?

Generic drugs have the same active ingredients as brand name drugs. They usually cost less than brand name drugs and generally work just as well. They usually don't have well-known names. Generic drugs are approved by the Food and Drug Administration (FDA). There are generic drugs available for many brand name drugs. Depending on state laws, generic drugs usually can be substituted for brand name drugs at the pharmacy without a new prescription. Our plan covers both brand name and generic drugs.

Talk with your doctor or prescriber to see if any of the brand name drugs you take have generic versions. Then review the Drug List to make sure you are getting the drug you need for the least amount of money.

The Drug List shows **brand name (B)** drugs in **bold** type (for example, **Humalog**) and generic (G) drugs in plain type (for example, Simvastatin).

What are original biological products and how are they related to biosimilars?

On the Drug List, when we refer to drugs, this could mean a drug or a biological product. Biological products are drugs that are more complex than typical drugs. Since biological products are more complex than typical drugs, instead of having a generic form, they have alternatives that are called biosimilars. Generally, biosimilars work just as well as the original biological product and may cost less. There are biosimilar alternatives for some original biological products. Some biosimilars are interchangeable biosimilars and, depending on state laws, may be substituted for the original biological product at the pharmacy without needing a new prescription, just like generic drugs can be substituted for brand name drugs.

For more information about drug types, please review your Evidence of Coverage, Chapter 3, Section 3.1. The Drug List tells which Part D drugs are covered.

What is a compounded drug?

A compounded drug is created by a pharmacist by combining or mixing ingredients to create a prescription medication customized to the needs of an individual patient. Compounded drugs may be Part D eligible. For more information about compounded drugs, please review your Evidence of Coverage.

Drug payment stage and drug tiers

The amount you pay for a covered prescription drug will depend on:

- Your drug payment stage. Your plan has different stages of drug coverage. When you fill a prescription, the amount you pay depends on the coverage stage you're in.
- Your drug's tier. Each covered drug is in 1 of 5 drug tiers. Each tier has a copay or coinsurance amount. The chart below shows the differences between the tiers.

If you need help or have any questions about your drug costs, please review your Evidence of Coverage or call UnitedHealthcare Customer Service. Our contact information is on the cover.

Drug tier	Includes
Tier 1:	Lower-cost, commonly used generic drugs.
Preferred Generic	
Tier 2:	Many generic drugs.
Generic	
Tier 3:	Many common brand name drugs, called
Preferred Brand	preferred brands and some higher-cost generic
	drugs.
Covered Insulin Drugs*	Insulin drugs with \$35 max copay.
Tier 4:	Non-preferred generic and non-preferred brand
Non-preferred Drug	name drugs.
Tier 5:	Unique and/or very high-cost brand and generic
Specialty Tier	drugs.

^{*} You will pay a maximum of \$35 for each 1-month supply of Part D covered insulin drugs through all drug payment stages, except the Catastrophic drug payment stage, where you pay \$0.

Getting Extra Help

If you qualify for Extra Help paying for your prescription drugs, your copays and coinsurance may be lower. Members who qualify for Extra Help will receive the Evidence of Coverage Rider for people who get Extra Help paying for prescription drugs (also called a Low Income Subsidy (LIS) Rider). Please read it to learn about your costs. You can also call UnitedHealthcare Customer Service. Our contact information is on the cover.

Are there any rules or limits on my drug coverage?

Yes, some drugs may have coverage rules or have limits on the amount you can get. If your drug has any coverage rules or limits, there will be a code(s) in the "Coverage rules or limits on use" column of the "Covered drugs by category" chart starting on page 28. The codes and what they mean are shown below and on the next page.

You can also get more information about the coverage rules and/or limits applied to specific covered drugs by visiting our website. We have posted online documents that explain our prior authorization and step therapy restrictions. If you would like a copy sent to you, please call UnitedHealthcare Customer Service. Our contact information is on the cover.

Coverage rules and limits

PA - Prior authorization

The plan requires you or your doctor or prescriber to get prior approval for certain drugs. This means the plan needs more information from your doctor or prescriber to make sure the drug is being used and covered correctly by Medicare for your medical condition. Certain drugs may be covered by either Medicare Part B (doctor and outpatient health care) or Medicare Part D (prescription drugs) depending on how it is used. If you don't get prior approval, the plan may not cover the drug.

QL - Quantity limits

The plan will only cover a certain amount of this drug for 1 copay or over a certain number of days. These limits can help ensure safe and effective use of the drug. If you are prescribed more than this amount or your doctor or prescriber thinks the limit is not right for your situation, you or your doctor or prescriber can ask the plan to cover the additional quantity.

ST - Step therapy

There may be effective, lower-cost drugs that treat the same medical condition as this drug. You may be required to try 1 or more of these other drugs before the plan will cover your drug. If you have already tried other drugs or your doctor or prescriber thinks they are not right for you, you or your doctor or prescriber can ask the plan to cover this drug.

You and your doctor or prescriber may ask the plan for an exception to the coverage rules and/or limits for your drug. See the section "How can I get an exception?" on page 8 or see your Evidence of Coverage to learn more.

If you don't get approval from the plan before you fill a prescription for a drug with coverage rules or limits, you may have to pay the full cost of the drug.

B/D - Medicare Part B or Part D

Depending on how this drug is used, it may be covered by either Medicare Part B (doctor and outpatient health care) or Medicare Part D (prescription drugs). Your doctor or prescriber may need to provide the plan with more information about how this drug will be used to make sure it's correctly covered by Medicare.

LA - Limited access

Drugs are considered "limited access" if the FDA says the drug can only be given out by certain facilities, doctors or prescribers. These drugs may require extra handling, provider coordination or patient education that can't be done at a network pharmacy.

MME - Morphine milligram equivalent

Additional quantity limits may apply to all opioid drugs used to treat pain. This additional limit is called a cumulative morphine milligram equivalent (MME). It's designed to monitor safe dosing levels of opioids for people who may be taking more than 1 opioid drug for pain management. If your doctor or prescriber prescribes more than this amount or thinks the limit is not right for your situation, you or your doctor or prescriber can ask the plan to cover the additional quantity.

7D - 7-day limit

An opioid drug used to treat pain may be limited to a 7-day supply if you don't have a recent history of using opioids. This limit helps minimize long-term opioid use. If you are new to the plan and have a recent history of using opioids, the pharmacy may override the limit when appropriate.

DL - Dispensing limit

Dispensing limits apply to this drug. This drug is limited to a 1-month supply per prescription.

What if my drug is not on this list?

If your drug is not included in this Drug List, we may still cover it. Call UnitedHealthcare Customer Service to ask if it's covered. Our contact information is on the cover.

If you find out that your drug is not covered, you can do either of the following options:

- Ask UnitedHealthcare Customer Service for a list of similar drugs that are covered by the plan. When you get the list, show it to your doctor or prescriber and ask them to prescribe a covered drug.
- 2. **Ask the plan to make an exception** and cover your drug. Review the next section for more exception information.

How can I get an exception?

Sometimes you may need to ask for drug coverage that's not normally provided by your plan. This is called asking for an exception. When you do, the plan will review your request and give you a coverage decision known as a coverage determination.

Types of exceptions you can ask for

- **Drug List exception:** Ask the plan to cover your drug even if it's not on the Drug List. If approved, this drug will be covered at a pre-determined cost-sharing level. You will not be able to ask us to provide the drug at a lower cost-sharing level.
- **Utilization exception:** Ask the plan to revise the coverage rules or limits on your drug. For example, if your drug has a quantity limit, you can ask the plan to change the limit and cover more.
- **Tiering exception:** Ask the plan to cover your drug on our list at a lower cost-sharing level if this drug is not on the Specialty Tier. If approved this would lower the amount you pay out-of-pocket for your drug.

The plan may approve your request for an exception if the covered alternative drugs wouldn't be as effective in treating your condition or would cause adverse medical effects.

Who can ask for an exception?

You, your authorized representative, doctor or prescriber can ask for an exception by calling UnitedHealthcare Customer Service. Your doctor or prescriber must give us a supporting statement with the reason for the exception.

How long does it take to get an exception?

After we get the statement from your doctor or prescriber supporting your request for an exception, we'll give you a decision within 72 hours. You can ask for an expedited (fast) decision if you or your doctor or prescriber believes that your health could be seriously harmed by waiting 72 hours. If your request for an expedited review is approved, we'll give you a decision within 24 hours after we get your doctor's or prescriber's supporting statement.

Can I get my drug while I wait for an exception?

As a new or continuing member in our plan, we may cover a temporary supply of your drug if it's not on our Drug List or if it has rules or limits. For example, you may need a prior authorization from us before you can fill your prescription. During the time when you are getting a temporary supply, you should talk with your doctor or prescriber to decide if there is a similar drug on the Drug List you can take instead. If you and your doctor or prescriber decide this is the only drug that will work for you, you will need to ask for an exception. For more information about exceptions, please review your Evidence of Coverage.

We may cover your drug in certain cases during the first 90 days of your membership. The following chart shows how much of your drug we may cover while you ask for an exception.

If you	And you are	We may cover
are a new member in the first 90 days of your membership	not in a nursing home or long-term care facility	at least a 30-day temporary supply
OR were a member last year and it's the first 90 days of your plan year	in a nursing home or long-term care facility	at least a 31-day temporary supply
have been in the plan for more than 90 days	in a nursing home or long-term care facility and need a supply right away	at least a 31-day emergency supply
are going through a change in your level of care, such as being transferred from a	not in a nursing home or long-term care facility	at least a 30-day temporary supply
hospital to a long-term care facility, any time during the year	in a nursing home or long-term care facility	at least a 31-day temporary supply

The prescription must be filled at a network pharmacy. If your prescription is written for fewer days, we'll allow refills to provide at least the day supply listed in the chart above. Note: The long-term care pharmacy may provide the drug in smaller amounts at a time to prevent waste.

We will not pay for more of your drug after you get this temporary or emergency supply unless you receive authorization from the plan.

Can the Drug List change?

Most changes in drug coverage happen on January 1. We may need to make changes during the plan year for safety or other reasons that can affect you. We must follow the Medicare rules in making these changes. Updates to the Drug List are posted on our website monthly.

Changes that can affect you this year

• Immediate substitutions of certain new versions of brand name drugs and original biological products. We may immediately remove a drug from our Drug List if we are replacing it with a certain new version of that drug that will appear on the same or lower cost-sharing tier and with the same or fewer restrictions. When we add a new version of a drug to our Drug List, we may decide to keep the brand name drug or original biological product on our Drug List, but immediately move it to a different cost-sharing tier or add new restrictions.

We can make these immediate changes only if we are adding a new generic version of a brand name drug, or adding certain new biosimilar versions of an original biological product, that was already on the Drug List (for example, adding an interchangeable biosimilar that can be substituted for an original biological product by a pharmacy without a new prescription).

If you are currently taking the brand name drug or original biological product, we may not tell you in advance before we make an immediate change, but we will later provide you with information about the specific change(s) we have made.

If we make such a change, you or your doctor or prescriber can ask us to make an exception and continue to cover for you the drug that is being changed. For more information, see the section "How can I get an exception?" on page 8.

Some of these drug types may be new to you. For more information, see the section titled "What are original biological products and how are they related to biosimilars?".

• Other changes. We may make other changes that affect members currently taking a drug. For instance, we may remove a brand name drug from the Drug List when adding a generic equivalent or remove an original biological product when adding a biosimilar. We may also apply new restrictions to the brand name drug or original biological product or move it to a different cost-sharing tier or both. We may make changes based on new clinical guidelines. If we remove drugs from our Drug List, add prior authorization, quantity limits and/or step therapy restrictions on a drug or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 30 days before the change becomes effective. Or, when a member requests a refill of the drug, they may receive at least a 30-day supply of the drug and notice of the change.

If we make these other changes, you or your doctor or prescriber can ask us to make an exception for you and continue to cover the drug you have been taking. The notice we provide you will also include information on how to request an exception. For more information, see the section "How can I get an exception?" on page 8.

• **Drugs removed from the market.** If the Food and Drug Administration (FDA) says a drug you are taking is not safe or effective or the drug's manufacturer takes a drug off the market, we may immediately take it off the Drug List. If you are taking the drug, we will send you a notice after we make the change.

Changes that will not affect you if you are currently taking the drug

Usually, if you're taking a drug on this Drug List that was covered at the beginning of the year, we will not remove or reduce coverage during the year except as described above. You will not get a notice this year about changes that do not affect you. However, on January 1 of the next year these changes will affect you, therefore it is important to check the Drug List for any changes to drugs for the new plan year.

Drugs with dosages other than a 1-month supply

Drugs packaged in an extended day supply

Some drugs are packaged from the manufacturer to provide more than a 1-month supply. When you fill these drugs, you may have to pay more than 1 copay/coinsurance for a single prescription. For more information, please call Customer Service. Our contact information is on the cover.

Daily cost-sharing for oral medications filled for less than a 1-month supply

A daily cost-sharing rate may apply when your doctor prescribes less than a full month's supply of certain drugs for you and you are required to pay a copay. A daily cost-sharing rate is the copay divided by the number of days in a month's supply.

Daily cost-sharing applies only if the drug is in the form of a solid oral dose (e.g., tablet or capsule) when dispensed for a supply of less than 1-month under applicable law. The daily cost-sharing requirements do not apply to either of the following:

- 1. Solid oral doses of antibiotics
- 2. Solid oral doses that are dispensed in their original container or are usually dispensed in their original packaging to help patients comply with usage and dosage directions

Covered drugs by category

The list below has information about the drugs covered by this plan. If you have trouble finding your drug, turn to the "Covered drugs by name (**Drug index**)" on pages 12-27.

The first column lists the drug name, which may include the dosage form and strength. **Brand name (B)** drugs are listed in **bold** type (for example, **Humalog**) and generic (G) drugs are listed in plain type (for example, Simvastatin). The **(B)** or (G) identifier is listed in the "Brand or Generic" column. The information in the "Coverage rules or limits on use" column lists any special requirements for coverage of your drug. If quantity limits (QL) apply to a drug, the restriction amounts are shown in the chart on pages 86-114.

Covered drugs with a quantity limit (QL)

This list shows drugs that have a quantity limit. Some drugs come in several strengths. Each strength may have a different quantity limit. If quantity limits for a drug vary by strength, the different strengths are listed on separate lines. These limits may be in place to ensure your safety.

Your plan will cover only a certain amount of these drugs or will only cover these drugs for a certain number of days. For more information about quantity limits, talk with your doctor, prescriber or pharmacist. You can also call UnitedHealthcare Customer Service. Our contact information is on the cover.

Drugs are listed in alphabetical order in the chart below. **Brand name (B)** drugs are listed in **bold** type (for example, **Humalog**) and generic (G) drugs are listed in plain type (for example, Simvastatin). The **(B)** or (G) identifier is listed in the "Brand or Generic" column.
